

Pedigree Charts

Pedigree charts serve as genealogical maps to show how families are linked together. On the first page of these pedigree charts Marion Sharp, Jr. (Father) is listed as the first person, Marion Sharp, Sr., his father, is shown as the second

The first four generations of the family of Marion Sharp, Junior: **Father** (Marion Sharp, Jr. with his daughter Cathy), **Grandparents** (Marion Sharp with grandson, Richard Martin, and Claire Smith holding “Junior”), **Great-Grandparents** (Carlos Sharp, Sylvia Barker, Cora Bratton and Clyde Smith) and **Great-Great-Grandparents** (James Sharp, Willie Stephens, Louis Barker, Maude Fulk, Benjamin Bratton, Mary Redman, Henry Smith, and Maria Sidenbender).

person and so forth. Beside the name of each ancestor is an abbreviation of his or her relationship to Cathy, Ronald, Nancy, Richard (Sharp) Martin and their first cousins. For example, 2GG means Second Great-Grandfather or Second Great-Grandmother, if a female. 3GG means Third Great-Grandfather/mother and so forth. The pedigree charts show parents and grandparents only, no aunts or uncles are shown.

There are also pedigree charts at the end of each family history. Those charts pertain only to that particular family.
